

## NetLeverage for simple, secure and affordable IT solutions

**NetLeverage's appliances provide the network your business needs, with access and security you can afford**

Before NetLeverage, secure networking for Windows<sup>®</sup> was expensive to buy, difficult to install, complex to optimize, expensive to manage. In effect — designed for big business and beyond reach for small and medium business.

NetLeverage now gives you a new generation of “plug & play” appliances that are **simple** to install, use and manage, **secure** with “unified threat management” and **affordable** to buy, install and scale up.

**ThinPoint** product solutions give you secure remote access to your applications from anywhere, any device, at any time. **NetPoint** product solutions connect, secure and manage your network using a single “plug & play – set & forget” appliance that does the work of 6 servers.

### **Simple**

- ◇ True ‘plug & play’; installation in minutes not days
- ◇ Easy to use and manage without IT experts
- ◇ Compact, one device replaces many
- ◇ Compatible with Microsoft Windows<sup>®</sup>

### **Secure**

- ◇ ‘Always on’ Unified Threat Management
- ◇ Internet firewall and router
- ◇ Intrusion detection & prevention
- ◇ Virus and SPAM protection
- ◇ User access management

### **Affordable**

- ◇ Only pay for what you use
- ◇ Scalable, able to grow with your business
- ◇ Very low cost implementation and Total Cost of Ownership
- ◇ Extends the life of existing hardware/software

### **Local & proven**

- ◇ Used in over 500 Australian organisations
- ◇ Developed, made and supported in Australia
- ◇ Backed by industry veterans.

*ThinPoint and NetPoint: Simple ‘plug & play’ appliances that deliver affordable secure, full function networks for small and medium businesses*

## What our customers say...

### Medical

*"We have 2 remote sites linked to this one, and doctors moving between them. We were using Terminal Services, but if one remote computer froze, the whole system would crash. ThinPoint is far more stable".*

Neil Pack - IT Manager, Nelson Bay Medical Centre

### Legal

*"I used to use pcAnywhere®, but was often frustrated when I got home to discover the office PC wasn't set to host mode. Or I'd take work home on floppies - and then find I'd forgotten an important file. Now I can access my entire desktop from home - or anywhere".*

Ben Johnston - Partner, Addisons Lawyers

### Insurance

*"I can access my desktop from work, from home or from an internet café in Berlin - anywhere. Thinpoint is a great product for remote access".*

Alex Shead - Director, Milne Alexander Insurance & Risk

### Real Estate

*"NetLeverage is a highly functional solution at a very low price. The price is no reflection of its capability".*

Rob MacIntyre - Director, Carroll Real Estate

### Education

*"For non propeller heads like us, NetPoint is great solution. It's inexpensive, combines all functions in one, is easy to manage, and when we make changes at our end, it's versatile enough to cope"*

Ian Scott - Systems Manager, St Andrews Cathedral School

### Finance

*"It's working brilliantly.. It's a thousand times better than Citrix or Terminal Services.. It's the most robust system I've used for remote access*

T.B. - Managing Director, A large Australian Finance Company

*We have 3 branches and 4500 members and our system has to work 24x7. If it doesn't, we are more exposed than most businesses. NetLeverage simply works."*

Chris Carpenter - Manager, Blue Mountains & Riverlands Community Credit Union Limited

### Manufacturing

*"We have an unusual family business. We're in wine and manufacturing and we're spread over several countries. Now we can communicate, access and analyse data, and work from home, here or anywhere"*

Starbord Yeung - MD, Cheerine Group

### Printing

*We're very non technical and wanted a solution that was easy to use. With NetLeverage, we're all linked, we share programs, we even pay staff and suppliers on line. It's so much faster and easier"*

Leanne Blessington - Director, Green & Gold Printing

*"We've saved literally thousands on our investment in each of these products, particularly with ThinPoint which cost 85-90% less than it would have taken to achieve the same remote access capabilities with a comparable solution to Citrix®"*

*"NetLeverage offered a perfect fit for our networking needs at a fraction of the cost of higher profile solutions"*

Simon Bryan - IT Director, Our Lady of Mercy College

*"We're a family business in 3 states and I.T. was not our priority. We had 2 interstate offices that weren't linked to us here, each person dialing up for email. It was pretty basic. Now we have 3 states networked, a mail server, email and network security, all in one device. It's so much better."*

Goan Peck - Network Administrator, General Bearings

## About NetLeverage

NetLeverage was formed by Steven Hasani whose product vision was for simple "plug & play" Internet appliances for small and medium businesses.

They should be **simple** to install, easy to maintain and powerful enough to provide multiple functions simultaneously.

They should provide the highest levels of "always-on invisible **security**".

They should be upgradeable in the field to add new features as they are developed and should update themselves automatically.

Customers should expect the very latest connectivity and security is always available at **affordable** prices without expensive IT staff, overhead or upgrade costs.
